

Supplementary Figure S1. Expression of miR-1305, pri-miR-582 and PDE4D in human bladder cancer cell lines. (a) Expression level of miR-1305 in human bladder cancer cell lines. The relative expression of miR-1305 for each of the cell lines was calculated compared with the level in normal bladder tissue RNA. (b,c) Expression level of pri-miR-582 and *PDE4D* in UM-UC-3 and 5637 cells. The relative expressions were calculated compared with the level in normal bladder tissue RNA ($n=3$). * $P < 0.05$ versus NC.
