

b

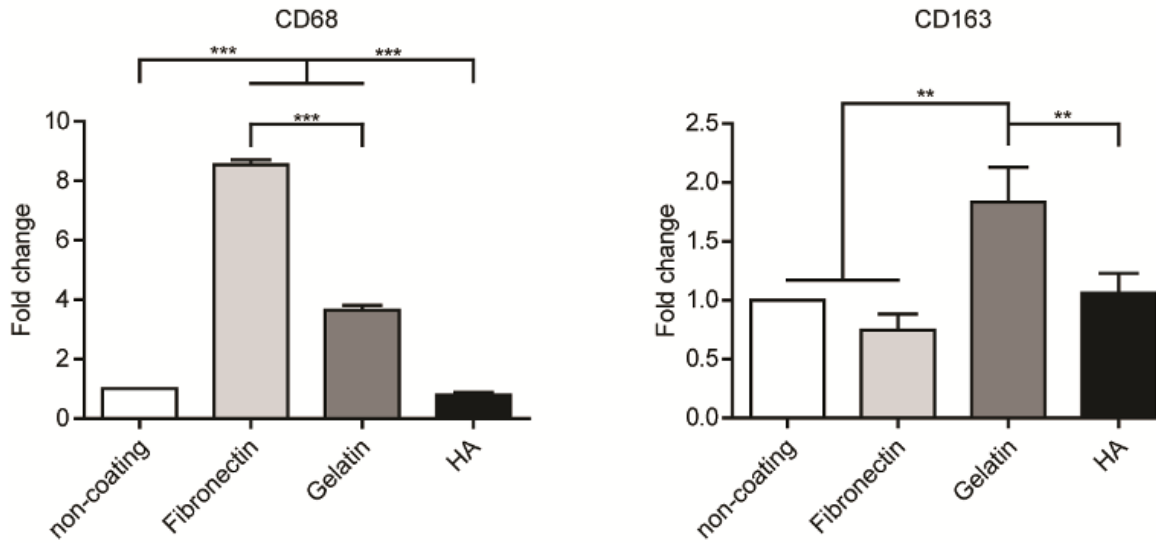

Figure S2: HA enhances gene expression of progenitor cell but not monocyte/macrophage. (a) Progenitor and (b) monocyte/macrophage gene expression in bone marrow mononuclear cells cultured on different coating materials were analyzed by real-time RT-PCR. Data are presented as mean \pm SEM. ** $P < 0.01$, *** $P < 0.001$. $n = 4$ per group.
