

Supplemental Figure S2.

Wildtype full length CD83 mRNA as well as CD83 Δ PRE mRNA was incubated with increasing amounts of AUF1p37 (lanes 1, 6: 1000 ng GST; lanes 2-5, 7-10: 100; 300; 700; 1000 ng of recombinant GST-tagged AUF1p37 protein). Binding of the proteins was evaluated by RNA gel shift experiments.
