

Additional file 2.

Characterization of the effects of lovastatin and etoposide on Capan-2 cells lines expressing Fucci reporters. Capan-2 cell lines cultured as monolayers and treated or not with lovastatin (60 μ M, 48 hours) or etoposide (40 μ M, 1 hour). (A) Visualization of Fucci-red and Fucci-green expressing cells. (B) Flow cytometry analysis of DNA content after DRAQ5 staining. (C) Quantification of the percentage of Fucci-red and Fucci-green expressing cells.
