

Figure S3. Harvested area of cereals as the proportion of each grid cell.

Source: Monfreda C, Ramankutty N, Foley JA (2008) Farming the planet: 2. Geographic distribution of crop areas, yields, physiological types, and net primary production in the year 2000. *Global Biogeochem Cycles*, 22: GB1022, doi:10.1029/2007GB002947. The map was drawn from data downloaded at: <http://www.geog.mcgill.ca/~nramankutty/Datasets/Datasets.html>.

75% kernel contours are shown with one colour assigned to each bird.
