

Additional file 4. Descriptive statistics for intervention coverage and health outcomes by sub-analyses (parasitemia and child mortality) for malaria transmission risk. For intervention coverage, units of observation are children under 5 years for parasitemia and children under 5 years who ever experienced the intervention during analysis exposure time for mortality.

Analysis	Level	% Intervention Coverage			Health Outcomes		
		ITN only	IRS only	ITN and IRS	Para. Prevalence (%)	No. Deaths	
Parasitemia	Transmission	High	53.1	0.8	2.8	40.4	-
		Medium	38.9	7.4	9.8	11.7	-
		Low	31.6	17.7	17.7	7.3	-
Child Mortality	Transmission	High	50.5	2.4	1.8	-	590
		Medium	50.7	9.2	5.4	-	780
		Low	31.9	6.0	2.6	-	382
