Treatment Effectiveness Assessment (TEA)

The TEA asks you to express the extent of changes for the better from your involvement in the program to this point (or how things are if it's your first TEA or baseline) in four areas: substance use, health, lifestyle, and community. For each area, think about how things have become better and circle the results on the scale below: the more you have improved, the higher the number - from 1 (not better at all) to 10 (very much better). In each area write down the one or two changes most important to you in the Remarks section. Feel free to use the back of this page to add details, explain remarks, and make comments.

Substance use: How much better are you with drug and alcohol use? Consider the frequency and amount of use, money spent on

	None	None or not much				Better			Much better
