

Online Supplement Data

Figure I

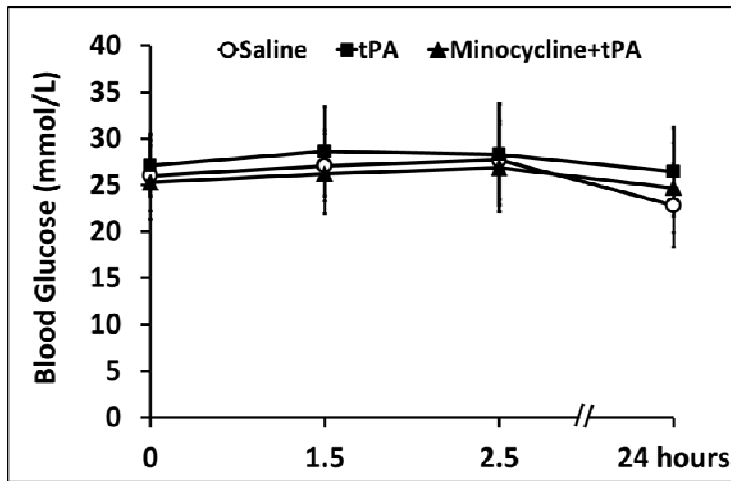

Figure I. Blood glucose concentrations were measured at before, 1.5, 2.5, and 24 hours after stroke. Data were expressed as mean + s.d., n=11-14 per group.

Figure II

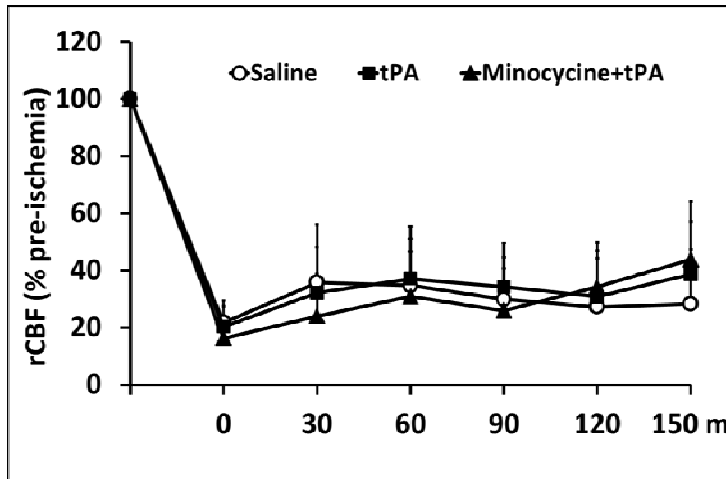

Figure II. Laser Doppler flowmetry monitored regional cerebral blood flow for up to 1 hour after treatment. Data were expressed as mean + s.d., n=11-14 per group.
