Other chronic diseases (CVD, diabetes, asthma, respiratory conditions, etc.)	31	11	7	1	4	2	7
Infectious disease	21	10	2	8	6	2	6
Behavioral (physical activity, diet, obesity, drug use)	17	7	10				1
Neurological issues and mental health (Parkinson's, depression, etc.)	13	4	3	5			3
Resource related (health clinic access, food or physical activity environments, optimizing location)	40	17	20	1	2		4
Air quality and climate	46	21	12	1	4		11
Other physical environment studies (toxic waste/landfill, electromagnetic fields, etc.)	22	13	2		1		7

* Each article can be represented more than once. Cells are not mutually exclusive, thus, the sum of cells does not equal the marginal totals and the sum of the marginal totals does not equal the number of unique articles (n=195). For example, a disparity article can involve 1 or more methods and an article that uses spatial proximity measures could involve 1 or more substantive categories.
