Genomic DNA of strains 1-4, 6-10 were provided by the laboratory from Spain, strain 5, 11 and 15 were provided by the Institute for Microbiology of the German Armed Forces. All other strains were provided by the Institute of Bacterial Infections and Zoonoses of the Federal Research Center for Animal Health (FLI). DNA concentrations of the DNA preparations ranged from 114,47 ng/µl – 563,59ng/µl.
