

p2

Supplemental Figure 2. Thymic microenvironment of 2 day old (p2) Foxn1-Cre::Dicer^{fl/fl} mice. Immuno- fluorescence analysis of thymic tissue sections from p2 Dicer^{fl/fl} or Foxn1-Cre::Dicer^{fl/fl} mice. Antibodies were used to identify fibroblasts (ERTR7), cortical (CK8) and medullary (MTS10, CK5) TEC. Original magnification 20x. Data are representative of two separate experiments.
