Fig.S2. Examples of H-NS binding signals categorized as "intergenic, "coding (single)"
and "coding (multiple)"

Fig. S2. Examples of the H-NS binding signals categorized as "intergenic," "coding (single)"
and "coding (multiple)"
Representative examples of the H-NS binding signals categorized as "intergenic" (A and B),
"coding (single)" (C and D) and "coding (multiple)" (E and F).
Arrows indicate the H-NS binding peaks (determined by visual inspection) in
the "intergenic" and "coding (single)" H-NS binding regions.
