

Supplementary Figure S2. Breakdown of all of the eukaryotic species detected in (A) 18S rRNA gene clone libraries (1500 clones considered for this analysis) (B) β -tubulin gene clone libraries (500 clones considered for this analysis)

18S rRNA gene sequences

β -tubulin gene sequences

- Euglenozoa
- Land plants
- Alveolates
- Cercozoa
- Stramenopiles
- Fungi
- Metazoa
- Parabasalia
- Diplomonads
- Amoebozoa
- Centroheliozoa
- Oxymonadida
- unclassified Eukaryotes
- Apusozoa
- Opisthokonta
- Cryptomonads
- Rhizaria
