Note: Data presented include effect size expressed per 1 standard deviation decrease in muscle attenuation with 95% confidence intervals.

* All models are adjusted for: age, current smoking status, alcohol use, and physical activity.

- Menopausal status and hormone replacement therapy are also included for in models among women.
- ** Additional covariate in SBP and DBP model: Hypertension Treatment;
Additional covariate in HDL and TG models: Lipid Lowering Treatment;
Additional covariate for FPG: Treatment for Diabetes.
