

Figure S4 Single-locus TRD analyses for SpPI2F₂. The p -value of the likelihood ratio tests are on the horizontal axes and genetic distances in cM on the y-axis. The blue line indicates gametic vs. null, and the green line indicates zygotic vs. null. The frequencies of the four F₂ genotypes are shown in different colours; from left to right: Sp homozygote (Sp1Sp2, blue), Sp1PI2, PI1Sp2 and PI homozygote (PI1PI2, brown).
