Abbreviation: IMRT, intensity-modulated radiation therapy.

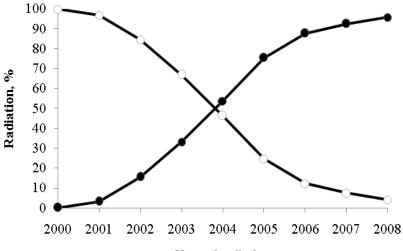

<sup>&</sup>lt;sup>a</sup>Rates shown are adjusted for the variables presented in Table 3, using propensity scores implemented by matching.

<sup>&</sup>lt;sup>b</sup>Rates for IMRT and proton were adjusted with a 2-stage least-squares instrumental variable approach in which Radiation Therapy Oncology Group affiliation predicts proton use: this predicted value was subsequently used as exposure in an adjusted outcome model to estimate the effect of IMRT vs proton on the outcome.

<sup>&</sup>lt;sup>c</sup>Because of zero cell counts, SEER region was not included in propensity score matched models.

<sup>&</sup>lt;sup>d</sup>Because of the small number of events and zero cell counts in some covariates in the propensity score—matched model, rate ratio could not be calculated.

eFigure: Use of IMRT vs. CRT for primary radiation treatment for localized prostate cancer

Year of radiation

Year	2000	2001	2002	2003	2004	2005	2006	2007	2008
IMRT	<11	93	448	917	1334	1841	2226	2671	787
CRT	1971	2799	2450	1846	1149	601	312	215	34

**Abbreviations**: IMRT, intensity-modulated radiation therapy; CRT, conformal radiation therapy.
