Suppl. Fig. 2. Model comparison of 1T, MA1, and SRTM vs. 2T for $[^{11}C]$ABP688 BP_{ND} for all conditions and ROIs. A) 1T slightly overestimated 2T BP_{ND} values, B) MA1 slightly underestimated 2T BP_{ND}, and C) SRTM underestimated 2T BP_{ND} indicated with the regression fit (solid line). The identity plot (dashed line) was added for reference. Only BP_{ND} estimates with percent standard error <20% were used in these comparisons.
