

Supplementary Table 4: Surface-exposed tyrosine residues on AAV2 and AAV6 capsids, and site-directed mutagenesis to phenylalanine residues.

AAV2	AAV6
Y252	Y252→F
Y272	Y273→F
Y444	Y445→F
Y500	F501
Y700	Y701→F
Y704	Y705→F
Y730	Y731→F

The surface-exposed tyrosine (Y) residues on AAV2 and AAV6 capsids are shown; red arrows denote the site-directed mutations from Y to phenylalanine (F) residues on AAV6 capsids.
