

Please follow the testing procedure below:

1

Follow Coaguchek Testing Procedure

1. Ensure that the device is on a stable, flat surface.
2. Check that the code displayed matches the last three digits on the test strip foil pouch.
3. Check that the time and date are correctly set.
4. Remove test strip from pouch and insert into the device.
5. Wait until the device displays the countdown from 180 - ensure that the sample is applied to the test strip before the countdown reaches zero.
6. Prick the tip of your middle or ring finger at the side using the lancet device.
7. Rub the outside of the finger until a large, hanging drop of blood has formed - DO NOT PINCH OR SQUEEZE.
8. Apply the drop of blood to the flashing yellow area of the test strip within 15 seconds of pricking your finger.
9. Check that the INR reading is displayed after the clock icon disappears.
