

The rMLST and whole genome NEIGHBORNET analyses described in this paper can be replicated with the following steps:

1. Navigate to the *Campylobacter* database on PubMLST.org (<http://pubmlst.org/campylobacter/>).
2. Select the isolate database:

The screenshot shows the 'Campylobacter MLST Home Page'. On the left is a 'Navigation' sidebar with links for PubMLST, Software, and Recently updated. The main content area is titled 'Campylobacter MLST Home Page' and contains a tree of databases. A red box highlights 'PubMLST Isolate Database' under the 'Campylobacter jejuni/coli' category. Below this are sections for 'Database submissions', 'Website and database managed by Keith Jolley', and 'Citing the database'.

To replicate Figure 2b: rMLST analysis of 89 ST-21 complex isolates. The isolates can be selected using a list query.

3. Click 'List query':

The screenshot shows the 'Welcome to the Campylobacter jejuni/coli PubMLST database' page. The 'Query database' section has a dropdown menu set to 'All loci' and a 'List query' button highlighted with a red box. Other sections include 'Option settings', 'General information', 'Breakdown', 'Export', 'Analysis', and 'Miscellaneous'.

4. Select 'isolate' as the search attribute, paste the following list in to the form and click 'Submit':

OXC6251	OXC6300	OXC6335	OXC6420	OXC6500	OXC6538	OXC6590	OXC6627

This analysis has been submitted to the job queue.
Please be aware that this job may take a long time depending on the number of comparisons and how busy the server is.
[Follow the progress of this job and view the output.](#)

Listings of variable, missing, matching and truncated loci, unique strains, and a NEIGHBORNET will be generated and displayed at the bottom of the page. Various output files are hyperlinked including the distance matrix used to generate the network. This can be loaded in to stand-alone Splitstree for further manipulation.

This is the NEIGHBORNET annotated in Figure 2b.

To replicate Figure 2c: 1643 locus analysis of ten isolates belonging to the ST-21 complex rMLST strain 3.

8. Return to the list query page as in step 3, select 'isolate' as the search attribute, paste the following list in to the form and click 'Submit':

CAMP1224 (Cj1306c)	9	hypothetical protein	63	54				X	X			17	56	66	54	1										
CAMP0631 (cipA)	5	invasion protein CipA					2*	3*	9*	8*		7*	4													
CAMP0575 (Cj0617)	4	hypothetical protein										24	26*			18*	30									
CAMP1413 (Cj1506c)	4	putative MCP-type signal transduction protein	97	1										79	25			23	77							
CAMP1228 (Cj1310c)	4	hypothetical protein	62	64*	8	65*		47	66	X	X															
CAMP1213 (Cj1295)	3	conserved hypothetical protein			1	80*						1	1	80*												
CAMP1214 (Cj1296)	3	hypothetical protein																								
² CAMP1236 (maf1)	3	motility accessory factor												52	53					8	8	12*				
² CAMP1250 (pseD)	3	pseD protein												84	X					20	20	18	25	13		
² CAMP1252 (maf4)	3	motility accessory factor												53	52					14	14	11	13	3		
² CAMP1253 (pseE)	3	pseE protein												58	128	119	120					45	42	42		
² CAMP1257 (maf6)	3	motility accessory factor															X	X								
CAMP0254 (cheV)	2	chemotaxis protein	1	80																						
CAMP0637 (Cj0691)	2	hypothetical protein						54	42																	
CAMP0751 (Cj0816)	2	hypothetical protein																								
CAMP0974 (cjel)	2	restriction modification enzyme								8	11*	11*														
CAMP1031 (Cj1110c)	2	putative MCP-type signal transduction protein		41	81					41	78	41														
¹ CAMP1258 (maf7)	2	motility accessory factor												52	100*	103*	82									
CAMP1331 (Cj1420c)	2	putative methyltransferase												15	65*								18	66*		
CAMP1256 (Cj1340c)	2	hypothetical protein																97	100				27	28	24	
CAMP0010 (rnhB)	1	probable ribonuclease HII		18	57																					
CAMP0019 (Cj0019c)	1	putative MCP-domain signal transduction protein																						72	72	71
CAMP0052 (fliM)	1	flagellar motor switch protein FliM																								
CAMP0068 (cdtB)	1	cytotolethal distending toxin B		1	26																					
CAMP0157 (Cj0170)	1	hypothetical protein																								
CAMP0167 (tonB1)	1	putative TonB-dependent outer membrane receptor																								
CAMP0202 (nrdF)	1	mononucleotide-di-phosphate reductase subunit beta		30	84																					
CAMP0208 (cynT)	1	carbonic anhydrase		23	51																					
CAMP0219 (Cj0249)	1	hypothetical protein																								
CAMP0252 (cheW)	1	chemotaxis protein																								
CAMP0253 (cheA)	1	chemotaxis histidine kinase																								
CAMP0363 (gatC)	1	gamma-glutamyl-tRNA amidotransferase subunit C																								
CAMP0573 (pstA)	1	putative phosphate transport system permease protein																								
CAMP0586 (Cj0628)	1	putative lipoprotein																								
CAMP0624 (kdpB)	1	potassium-transporting ATPase subunit B																								
CAMP0687 (Cj0741)	1	hypothetical protein																								
CAMP0714 (tpx)	1	thiol peroxidase																								
CAMP0749 (Cj0814)	1	hypothetical protein																								
CAMP0750 (Cj0815)	1	hypothetical protein																								
CAMP0803 (Cj0874c)	1	putative cytochrome C																								
CAMP0822 (aroA)	1	l-phenylalanine 1-carboxyvinyltransferase																								
CAMP0849 (cher)	1	putative MCP protein methyltransferase																								
CAMP0851 (rpiB)	1	ribose 5-phosphate isomerase																								
CAMP0898 (Cj0975)	1	putative outer-membrane protein		24	27																					
CAMP0899 (Cj0976)	1	putative methyltransferase		54	85																					
CAMP0950 (gyrA)	1	DNA gyrase subunit A																								
CAMP1064 (neuA1)	1	two-domain bifunctional protein																								
CAMP1097 (Cj1178c)	1	highly acidic protein																								
CAMP1108 (cetB)	1	bipartate energy taxis response protein cetB																								
CAMP1109 (cetA)	1	bipartate energy taxis response protein cetA																								
CAMP1123 (atpB)	1	FOF1 ATP synthase subunit A		23	67																					
CAMP1124 (radA)	1	DNA repair protein radA																								
CAMP1143 (Cj1224)	1	putative iron-binding protein																								
CAMP1165 (uvrC)	1	excinuclease ABC subunit C																								
CAMP1181 (racS)	1	two-component sensor (histidine kinase)																								
CAMP1243 (Cj1325)	1	putative methyltransferase																								
CAMP1255 (flaA)	1	flagellin																								
CAMP1283 (Cj1367c)	1	putative nucleotidyltransferase		20	136																					
CAMP1396 (ccoQ)	1	cb-type cytochrome C oxidase subunit IV		13	1																					
CAMP1422 (Cj1516)	1	putative periplasmic oxidoreductase																								
CAMP1442 (Cj1542)	1	putative allophanate hydrolase subunit 1																								
CAMP1510 (chuA)*	1	haem uptake system outer membrane receptor																								
CAMP1527 (Cj1631c)	1	conserved hypothetical protein																								
CAMP1572 (Cj1677)	1	putative lipoprotein																								
CAMP1581 (secY)	1	preprotein translocase subunit SecY																								
CAMP1631 (kdpA)*	1	dogene (potassium-transporting ATPase A subunit)	3*	2*																						

* involves change in homopolymeric tract length of assigned allele as compared to consensus for this ORF in strain 11166

X allele unassigned due to paralogous sequence

¹ Member of 617 family of variable genes (24).

² Member of 1318 family of variable genes (24).

Table S2. Allele numbers at loci where polymorphisms were identified between samples of the same sequence type, obtained from the same patient.

	Isolates	No of matching loci	No of variable loci	Percent matching
13	6471 / 6471R	1478	1	99.93
13	6472 / 6472R	1478	1	99.93
14	6484 / 6484R	1552	2	99.87
14	6485 / 6485R	1557	1	99.94
16	6566 / 6566R	1583	2	99.87
16	6575 / 6575R	1586	7	99.56
17	6595 / 6595R	1533	3	99.80
17	6610 / 6610R	1530	1	99.93
NA	6576 / 6576R	1455	6	99.59
NA	6578 / 6578R	1584	2	99.87

Table S3. Variation detected between repeated samples.
