

Supplementary Data

SUPPLEMENTARY FIG. S1. Effect of 50 μ M 3,4,6-O-tributanoylated-N-acetylglucosamine (3,4,6-O-Bu₃GlcNAc) exposure on chondrocytes cultured with or without interleukin-1 β (IL-1 β) in monolayer after 4 h of exposure ($n=3$, * $p < 0.05$, ** $p < 0.01$ vs. the negative control with respective IL-1 β concentration).
