**Table S1. List of the CIIR genes.** The name of the gene and the function and localisation of the protein are indicated in the first columns. The classification parameter given by each analytical method are indicated. In the two last columns we summerized our results on populations exposed to continuous low rate irradiation (CIIR gene) or to acute irradiation (High dose 200 Gy): rep :repressed ; ind : induced ; no : no variation).

**Figure S1**

**Figure S1: Kinetics of expression of CIIR genes exposed to a 200Gy acute irradiation.**  
Panel A: genes not affected by acute irradiation; Panel B: repressed genes; Panel C: induced genes. The lists of the genes are given in Table S1.
