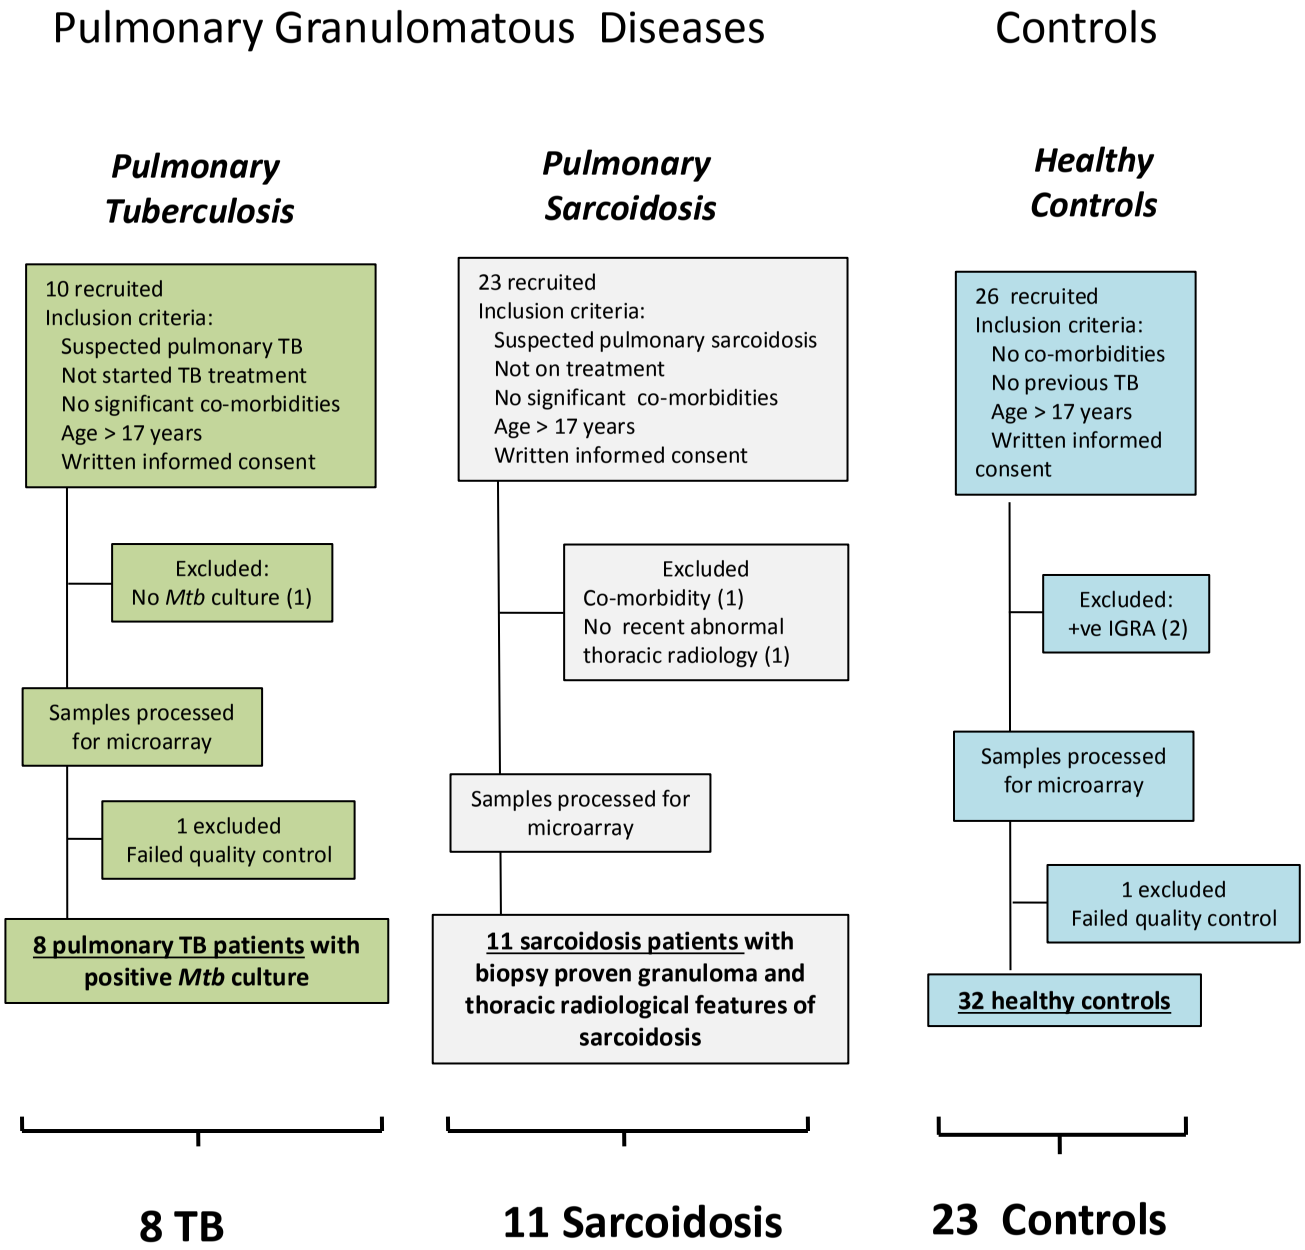
Figure S3



Pulmonary Granulomatous Diseases
Controls
Pulmonary Tuberculosis
Pulmonary Sarcoidosis
Healthy Controls
10 recruited
Inclusion criteria:
Suspected pulmonary TB
Not started TB treatment
No significant co-morbidities
Age > 17 years
Written informed consent
Excluded:
No Mtb culture (1)
Samples processed for microarray
1 excluded
Failed quality control
8 pulmonary TB patients with positive Mtb culture
23 recruited
Inclusion criteria:
Suspected pulmonary sarcoidosis
Not on treatment
No significant co-morbidities
Age > 17 years
Written informed consent
Excluded
Co-morbidity (1)
No recent abnormal thoracic radiology (1)
Samples processed for microarray
11 sarcoidosis patients with biopsy proven granuloma and thoracic radiological features of sarcoidosis
26 recruited
Inclusion criteria:
No co-morbidities
No previous TB
Age > 17 years
Written informed consent
Excluded:
+ve IGRA (2)
Samples processed for microarray
1 excluded
Failed quality control
32 healthy controls
8 TB
11 Sarcoidosis
23 Controls
