

Supplemental Figure 1

A

B

Supplemental Figure 1. *Casp2*^{+/+}/MMTV, *Casp2*^{+/-}/MMTV and *Casp2*^{-/-}/MMTV multiparous mice display significant differences in the number of pregnancies prior to tumor formation. The number of litters born (A) and the average number of pups/litter (B) for each genotype are shown. Error bars represent the SEM. p values were determined by one-way ANOVA.
