Probably a continuation of the upstream ORF MTV025.87c|Rv3739c|PPE67. At position 97470-72 a stop codon is present which interrupts a possibly longer ORF, observed in related ORFs MTV012_32 or MTCY21B4_4. The sequence has been checked and no errors were detected. A similar situation, but with a frameshift separating the ORFs is found in MTV012_36/MTV012_35. Sequence similarity is also seen with MTCY251_15; MTCY261_19; MLCB2492_30 from Mycobacterium leprae; MTCY10G2_10; MTY21C12_9; MTCI125_26; MTCY164_36; MTCY6A4_1."
