

1 Table S1: Strains, plasmids and primers used in this study

Designation	Relevant characteristics or sequences (5' to 3')^a	Reference or source
Strains		
<i>Erwinia amylovora</i> 273	Wild type strain of <i>Erwinia amylovora</i> 273 isolated from apple orchards of New York	(1)
<i>Agrobacterium tumefaciens</i> GV3101	Wild type, Rif ^r Gm ^r	(2)
Plasmids		
pPROBE-AT	Long life GFP Promoter-probe vector, Ap ^r	(3)
pPROBE-gfp[AAV]	Short life GFP Promoter-probe vector, Km ^r	(3)
pCPP5247	pLN314 expressing HopQ1, Cm ^r	(2)
phrpA		
phrpA	pPROBE-gfp[AAV] derivative with PCR fragment containing <i>hrpA</i> promoter, Km ^r	This study
phrpL	pPROBE-AT derivative with PCR fragment containing <i>hrpL</i> promoter, Km ^r	This study
phrpS	pPROBE-AT derivative with PCR fragment containing <i>hrpS</i> promoter, Ap ^r	This study
Primers		
Promoter cloning		
<i>hrpA</i> forward	ATAT <u>GGATCCCGATAAAGAGCAGCGTAG</u>	This study
<i>hrpA</i> reverse	ATTAG <u>AATTCTTAGACGCCTGAGCATTG</u>	This study
<i>hrpL</i> forward	ATAT <u>GGATCCAATATGTTGCTGCGCTCGG</u>	This study
<i>hrpL</i> reverse	ATTAG <u>AATTCTTAGACGCCTGAGCATTG</u>	This study
<i>hrpS</i> forward	ATAT <u>GGATCCTTGTGGAGTGTAAACCGC</u>	This study
<i>hrpS</i> reverse	ATTAG <u>AATTCAACCGCGACCAATTTC</u>	This study
Northern blot		
<i>hrpA</i> forward	GCGGCATTATTACAGGTATGGC	This study

<i>hrpA</i> reverse	GAAC TGAA TAGCTT AGCC GCG	This study
<i>hrpL</i> forward	GTCA ACGATGGGCTACCGC	This study
<i>hrpL</i> reverse	CTGTT CAGCGTGACGCG	This study
<i>hrpN</i> forward	AGTCTGAA TACAAGTGGGCTGGG	This study
<i>hrpN</i> reverse	CGCCCAGCTGCCAA	This study
<i>rsmB_{Ea}</i> forward	TGCTCCCTGCTCATCCTTGA	This study
<i>rsmB_{Ea}</i> reverse	CAGGAAGAGGTCA GGAACATCTCCAGG	This study
<i>rsmA_{Ea}</i> forward	TCGTCGAGTTGGT GAAACCC	This study
<i>rsmA_{Ea}</i> reverse	GTA ACTCGTTGCTGCGTCT	This study
qPCR		
<i>rplU</i> forward	ACAAC ACCGAG TAAGCGAAGGTCA	This study
<i>rplU</i> reverse	GCTTAA TATCACGCCGCCTGAAACT	This study
<i>hrpS</i> forward	ATATGCGT GTCATTGTCGCAACGC	This study
<i>hrpS</i> reverse	CGCCCGTAAAGGTTGCAGTTGAAT	This study
<i>rpoN</i> forward	TGGT GAAAAGTTAGTCTCGG	This study
<i>rpoN</i> reverse	CTGTTACGCTGATTGATG	This study
<i>hrpX</i> forward	GAGCCGCTCAAATTGCTCGAGTT	This study
<i>hrpX</i> reverse	ATCATTGCGATA GCCAACATGCG	This study
<i>hrpY</i> forward	GACCCGGAGAC GTTGCTGGC	This study
<i>hrpY</i> reverse	AACCCCTCTGCCAC GCGCTA	This study

2 ^aUnderlined bases indicate restriction sites in the primers. Ap^r, Cm^r, Gm^r, Km^r and Rif^r indicate
3 ampicillin, chloramphenicol, gentamycin, kanamycin and rifampicin resistance respectively.

4
