

SUPPLEMENTARY FIG. S5. CECs expressed relatively high levels of Sox2 and EpCAM compared with TTFs. RT-qPCR for the mRNAs of Oct4, Sox2, Klf4, cMyc, E-cadherin, and EpCAM in mouse TTFs and CECs. Data are normalized for GAPDH expression and presented as mean±SEM for three replicates. **P* value<0.01; ***P* value<0.05.
