

Table S1: Endoscopic and histological characteristics included in the objective pouchitis score used to define inflammation.

Trait	Severity	Scoring
Erythema	None, mild, severe	0, 2, 3
Friability	None, mild, severe	0, 1, 2
Ulceration	None, mild, severe	0, 2, 3
Polymorphonuclear leukocyte infiltration	None, discrete and patchy (largely confined to surface epithelium), moderate (\pm) crypt abscesses or cryptitis, extensive (\pm) crypt abscesses or cryptitis	0, 1, 2, 3
Ulcerations/Erosions	None, mild and superficial, moderate, extensive	0, 1, 2, 3
Total possible score		14
Total score for inflammation		>3
