

Supplementary FIGURE S2.

Predominant Expression of Aldehyde Dehydrogenase 7A1 by PrCa Cell Cultures.

Legend to Figure S2. Indirect immunofluorescent staining of Prostate Cancer Cells (Pr#87) with antisera specific for ALDH isotypes 1A3 and 7A1 and non-immune rabbit control serum. PrCa cells (Pr#87) were grown on coverslips, fixed in methanol and stained with rabbit anti-bodies to ALDH1A3 (A), ALDH7A1 (B), and non-immune rabbit serum (C). Scale bars = 50 μ m.
