B

C

Epigenetic events detected among samples A -> F

(A) Histone deacetylase was found in multiple copies, with the bars indicating the variations of their expression levels. (B) Contrasting expression patterns of homologs for dicer (ABCDEF_40338) and argonaute 1 (AGO-1; ABCDEF_38770). (C) Expression pattern of a protein phosphatase across samples, with variations of abundance levels from multiple copies shown by bars.
