For *OsCTR2* expression measurement, the primer set was OsCTR2-F and OsCTR2-R.

Expression of *OsCTR3* was measured with the primer set OsCTR3-F and OsCTR3-R.

EF4-F and EF4-R were for *EF4* (Os 11g0621500) expression measurement. *SAP*

(Os02g0324700) expression was measured with the primer set SAP-F and SAP-R.

*Sub1C* expression was measured with the primer set Sub1C-F and Sub1C-R. The primer set ADH2-F and ADH2-R was for *ADH2* expression measurement. *SC129* expression was measured by SC129-F and SC129-R. The internal calibrator for rice gene expression was OsActin with the primer set was OsAct-F and OsAct-R. For Arabidopsis *ERF1* measurement, *Ubiquitin* was used as the internal calibrator, with

the primer set UBI-F and UBI-R. *Arabidopsis* CTR1 copy number was measured with the primer set CTR1-F and CTR1-R.
