Total	A	58	34.42	5.49*** (6.51)	0.684	24	50.67	3.50 (2.37)	0.167	25	32.67	8.81*** (9.05)	0.752	0.510
	P	57	37.01	4.62*** (4.82)		27	51.05	-0.69 (-1.20)						

<sup>a</sup>LSMean values were derived from a model comparing atomoxetine-treated subjects with placebo-treated subjects within the diagnostic group.

<sup>b</sup>Atomoxetine versus placebo *p* value.

<sup>c</sup>ADHD + D (atomoxetine) versus dyslexia-only (atomoxetine) *p* value.

<sup>d</sup>ADHD + D (atomoxetine) versus ADHD-only (atomoxetine) *p* value.

Intra-group *p* values: \**p* < 0.05; \*\**p* < 0.01; \*\*\**p* < 0.001; *p* values from *t* tests on LSMean change.

A, atomoxetine; ADHD, attention-deficit/hyperactivity disorder; ADHD + D, attention-deficit/hyperactivity disorder + dyslexia; ADHDRS, Attention-Deficit/Hyperactivity Disorder (ADHD) Rating Scale; ADHDRS-IV-Parent:Inv, ADHDRS-IV-Parent Version: Investigator-Administered and Scored; LSMean, least-squares mean; P, placebo; T<sub>x</sub>, treatment.
