

Supplementary Table S1. List of the 559 accessions and control reference varieties analyzed in the study. Country of origin codes are according to the ISO 3166-1 alpha 3 standards. Fifty-five genotypes with accession identification starting with "Turkmn" were introduced from the 'Turkmenian Experimental Station of Plant Genetic Resources, Garrygala, Turkmenistan' in 1996. Dr. Nolsulchak acquired ten accessions of *V. vinifera* subsp. *sylvestris* from Turkmenistan as seeds gathered from the Koptdag mountain range in 1993.

Accession ID	Repository	Accession Name	Prime Variety Name	Country of origin/ Source collection	Species Davis / Vassal
