

Additional Figure 1

Additional Figure 1: Venn diagrams of comparisons from various sets of genes.

(A-H) Venn diagrams displaying number of distinct and mutual genes between different sets of differentially expressed genes.

(A-F) Numbers of genes induced or repressed in males and females by over-expression of FruMA, FruMB or FruMC in fru P1-expressing neurons of the head.

(G-H) Numbers of genes induced or repressed by FruM as determined by FruM loss of function analysis, and induced or repressed by over-expression of FruMA, FruMB, or FruMC isoforms.
