
 Supplemental Table 1. Psychosis Symptoms Assessed in Childhood and Adulthood

Childhood (age 11) Psychosis Symptoms

1. Some people believe in mind reading or being psychic. Have other people ever read your mind?
 2. Have you ever had messages sent just to you through television or radio?
 3. Have you ever thought that people are following you or spying on you?
 4. Have you heard voices other people can't hear?
-

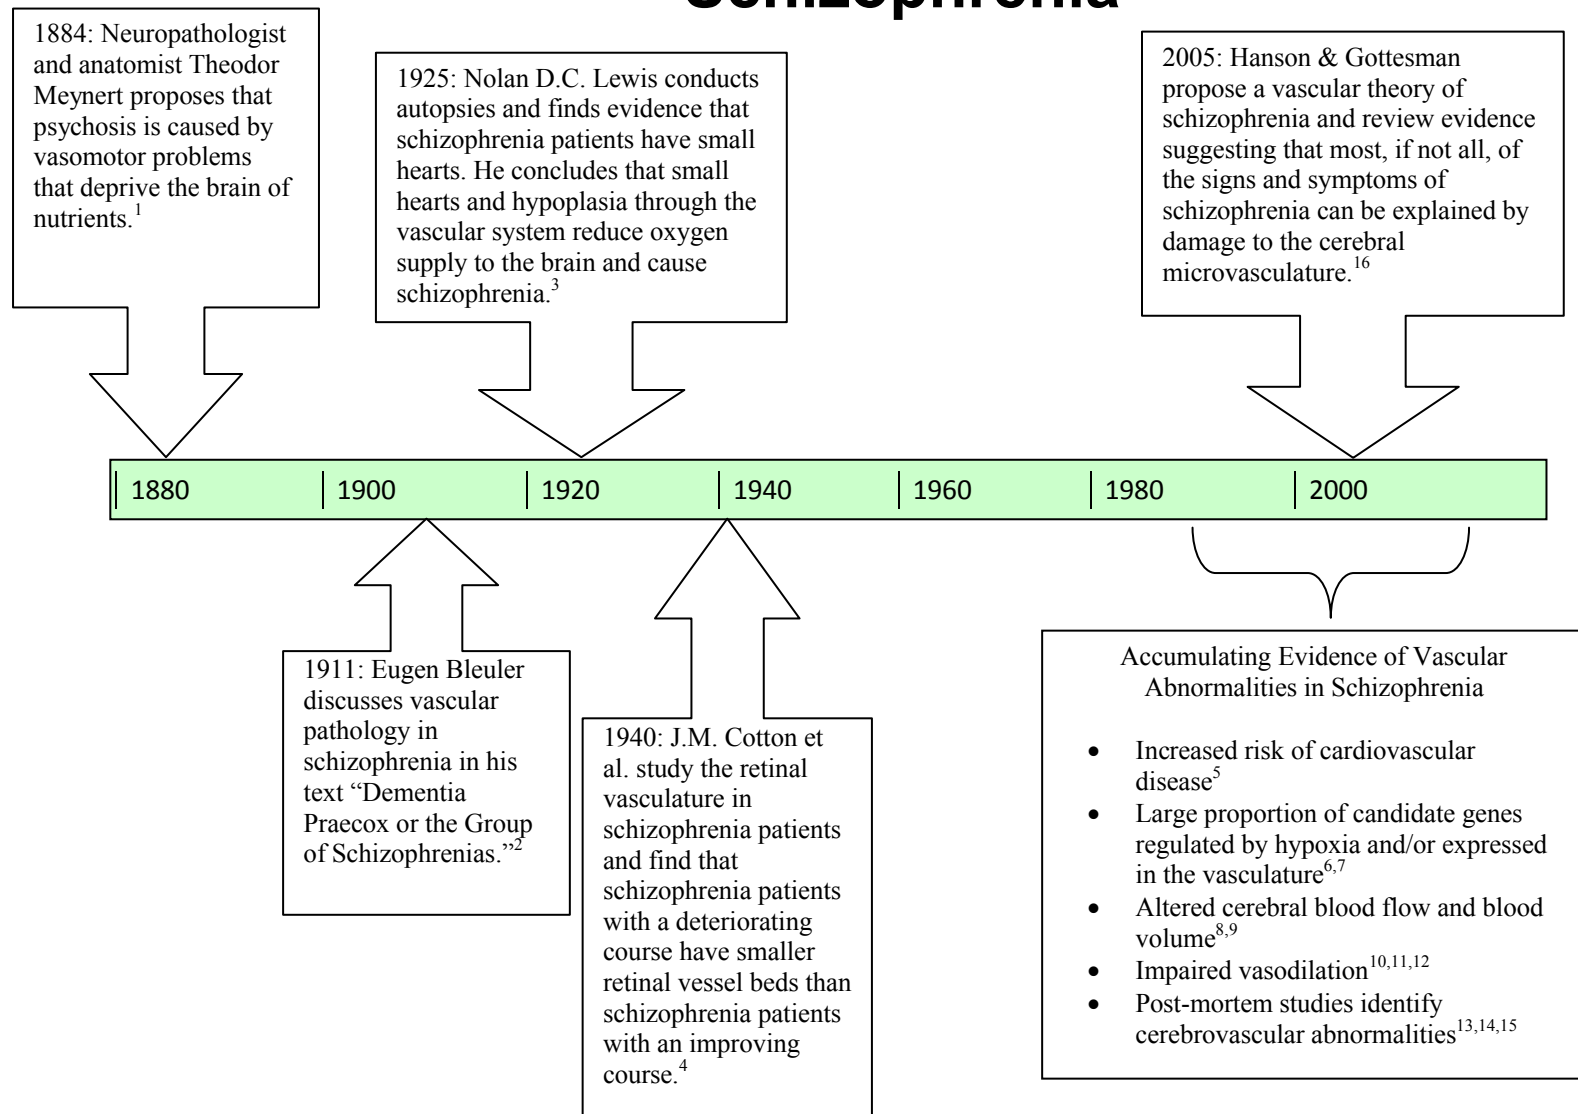

Adulthood (ages 21-38) Psychosis Symptoms

1. Have you believed that someone was plotting against you or trying to hurt or poison you?
 2. Have you believed that someone was spying on you?
 3. Have you believed that you could hear what another person was thinking, even though they were not speaking?
 4. Have you believed that a person, power, or force could control your movements or thoughts against your will?
 5. Have you felt that someone took your thoughts out of your mind?
 6. Have you believed that you were being sent special messages through the television or radio, or that a program, song or news story had been made just for you?
 7. Have you experienced hearing things or hearing voices that other people cannot hear?
 8. Have you had unusual feelings inside or on your body, like being touched when there was nothing there, or feeling as if something was moving inside your body?
-

Note. Childhood psychosis symptoms were scored either '0' = no; '1' = yes, likely; and '2' = yes, definitely. Adulthood psychosis symptoms were scored either '0' = no or '1' = yes, experienced this symptom.

Supplemental Figure 1. A brief history of the vascular hypothesis of schizophrenia.
