					MJ99-116, monkey (AB107969)	(c,d)	ST2 (98.3)		
					MJ99-424, monkey (AB107967)	(a,b)	ST1 (99.7)	LF-45	L4-33/F
					MJ99-116, monkey (AB107969)	(c,d)	ST2 (98.3)		

Designation: Subtype of *Blastocystis* (ST), Libyan (L), female (F), male (M). *Blastocystis* isolate from Libyan male (LM), male with symptom (LMS), female (LF), female with symptom (LFS). Isolate clones sequences (bold font) and the reference isolates (accession number) were used in the phylogenetic analysis. Specimens L18-9/F and L5-27/M were co-infected with *Giardia intestinalis* and *Cryptosporidium* species, respectively.
