

Supplemental Data

An LC/MS/MS method for stable isotope dilution studies of β -carotene bioavailability, bioconversion and vitamin A status in humans. Oxley, Berry, Taylor, Cowell, Hall, Hesketh, Lietz, Boddy.

Fig. I.

Flow-injection APCI-MS/MS product ion mass spectra of m/z 537 *all-trans*- β -carotene (A) and m/z 537 *9-cis*- β -carotene (B) in positive mode.
