

**Constitutive expression of mammalian nitric oxide synthase in plant triggers
disease resistance responses to pathogens**

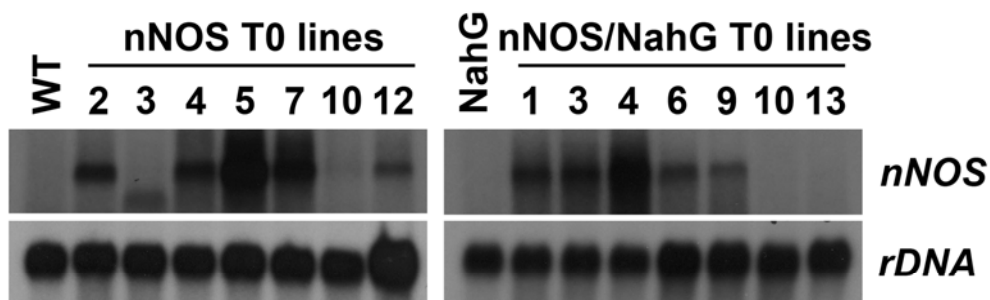

Figure S1

Fig. S1. Expression of *nNOS* gene in tobacco transgenic T₀ lines.

Total RNA was isolated from axenically grown wild-type plant (*WT*), *nNOS* transgenic T₀ plants (*nNOS*), *NahG* transgenic plant (*NahG*), and *nNOS/NahG* transgenic T₀ plant (*nNOS/NahG*). The transcript levels of *nNOS* gene were analyzed by Northern blot analysis. The *rDNA* transcript was used as a loading control.
