

Table S3. Number of embryos per time class according to physiological age.

This table plots the number of embryos per assigned time class (C10–C13, C14A: T1–T8) versus the time of fixation (in hr:min after egg activation). See Materials and Methods in the main text for details on egg activation, embryo fixation, and assignment of embryos to time classes.

	C10	C11	C12	C13	T1	T2	T3	T4	T5	T6	T7	T8	TOTAL
3:15	11	1											12
3:30		10											10
4:00			17										17
4:30				29									29
4:45				4									4
5:30				5									5
5:40				4	21	5							30
6:00				4	11	1							16
6:30					4								4
6:45					1	12	22	1					36
7:00						2	17	18	4		1		42
7:30							13	12	13	25	24	5	92
7:45									9	8	12	15	44
8:00										2	8	23	33
Total	11	11	17	46	37	20	52	31	26	35	45	43	374
