

SUPPLEMENTARY DATA

Supplementary Figure 1. The effect of different GLP-1 regimens on postprandial glycemia plotted over time.

Supplementary Figure 2. The effect of different GLP-1 regimens on postprandial insulinemia plotted over time.

SUPPLEMENTARY DATA

Supplementary Figure 3. The effect of different GLP-1 regimens on postprandial insulin/glucose ratios. Postprandial insulin/glucose (I/G) ratio was reduced during acute GLP-1 when compared to placebo (P=0.035), and intermittent when compared to prolonged (P=0.002).
