

Supplementary movie legends

Movie 1. A time-lapse movie (one frame every 2 mins) showing an HIV-1_{NL-Gag-JRFL}-infected MDM transferring virus from a VCC-like compartment to a contacting autologous CD4⁺ T cell starting at 30 mins.

Movie 2. A time-lapse movie (one frame every 5 mins) showing an HIV-1_{NL-Gag-JRFL}-infected MDM transferring virus from dispersed VCC-like compartments to a contacting autologous CD4⁺ T cell with T cell detaching at T = 76.02 mins.
