

Supplementary Information

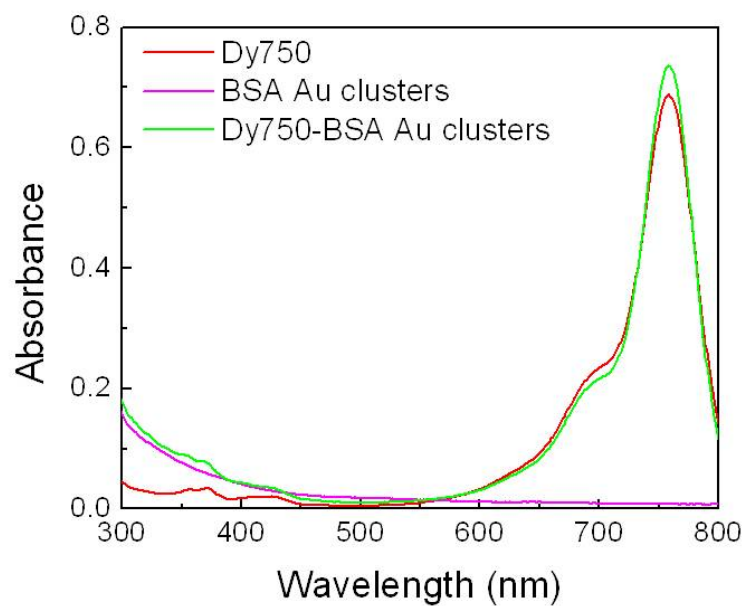

Resonance Energy Transfer Between Fluorescent BSA Protected Au Nanoclusters and Organic Fluorophores

Sangram Raut,^{*a} Ryan Rich^a, Rafal Fudala, Susan Butler^a, Rutika Kokate^a, Zygmunt Gryczynski^{ac}, Rafal Luchowski^d, and Ignacy Gryczynski^{*ae}

Supplementary Figure 1: Absorption spectrum of PB-BSA (blue), BSA Au clusters (magenta) and PB conjugated BSA Au clusters (green). Care was taken to match the absorptions of control samples with PB-conjugated BSA Au clusters

Supplementary Information

Supplementary Figure 2: Absorption spectrum of Dy750-BSA (red), BSA Au clusters (magenta) and Dy750 conjugated BSA Au clusters (green). Care was taken to match the absorptions of control samples with Dy750 conjugated BSA Au clusters.
