

Induction of apoptosis by directing oncogenic Bcr-Abl into the nucleus - Huang et al

Supplemental figure 1: The subcellular localization of F3NF, H2FA and H2FATM was observed by immunofluorescent assay.

Supplemental figure 2: The result of methylcellulose colony-forming assay.

Supplemental figure 3: The mRNA level of p73 was detected by RT-PCR.

Supplemental figure 4: The mRNA level of p21, PUMA and Bax was analyzed by RT-PCR.

Supplemental figure 5: The maximum inhibitory effect of siRNA on p73 was detected by RT-PCR.

Supplemental figure 6: Wright's staining of peripheral blood smears of mice. (a) normal peripheral blood smear, (b) peripheral blood smear from morbid mouse.
