Title: Mapping the kinetic barriers of a large RNA molecule's folding landscape

Authors: Jörg C. Schlatterer, Joshua S. Martin, Alain L. Laederach, Michael Brenowitz

**Figure S2.** Fraction native of the L-21 Sca I RNA at a given temperature determined by standard activity assays<sup>1</sup>. All experiments were repeated three times and averaged. Fraction native was normalized to the 51°C data. Error bars for 25, 31, and 36°C data overlap with the symbol.
