

FIG E1. Distribution of the fold increase in threshold dose of peanut protein inducing allergic symptoms for OFC2 compared with OFC1 ($n = 13$). *Open circles* indicate group A subjects; *solid circles* indicate group B subjects. The median response is indicated by the *red bar*.

TABLE E1. Numbers of patients with evaluable data for each end point

	OFC1		OFC2		OFC3	
	Group A	Group B	Group A	Group B	Group A	Group B
Threshold dose	5	9	5	8	4	6
BHR	5	9	5	9	0	7*
SPTT	5	9	5	9	5	7

*BHR at OFC3 was only obtained for group B subjects per the study protocol.
