- 4 Supplementary Figures
- 5 Supplementary Tables

Supplementary Figure S1.

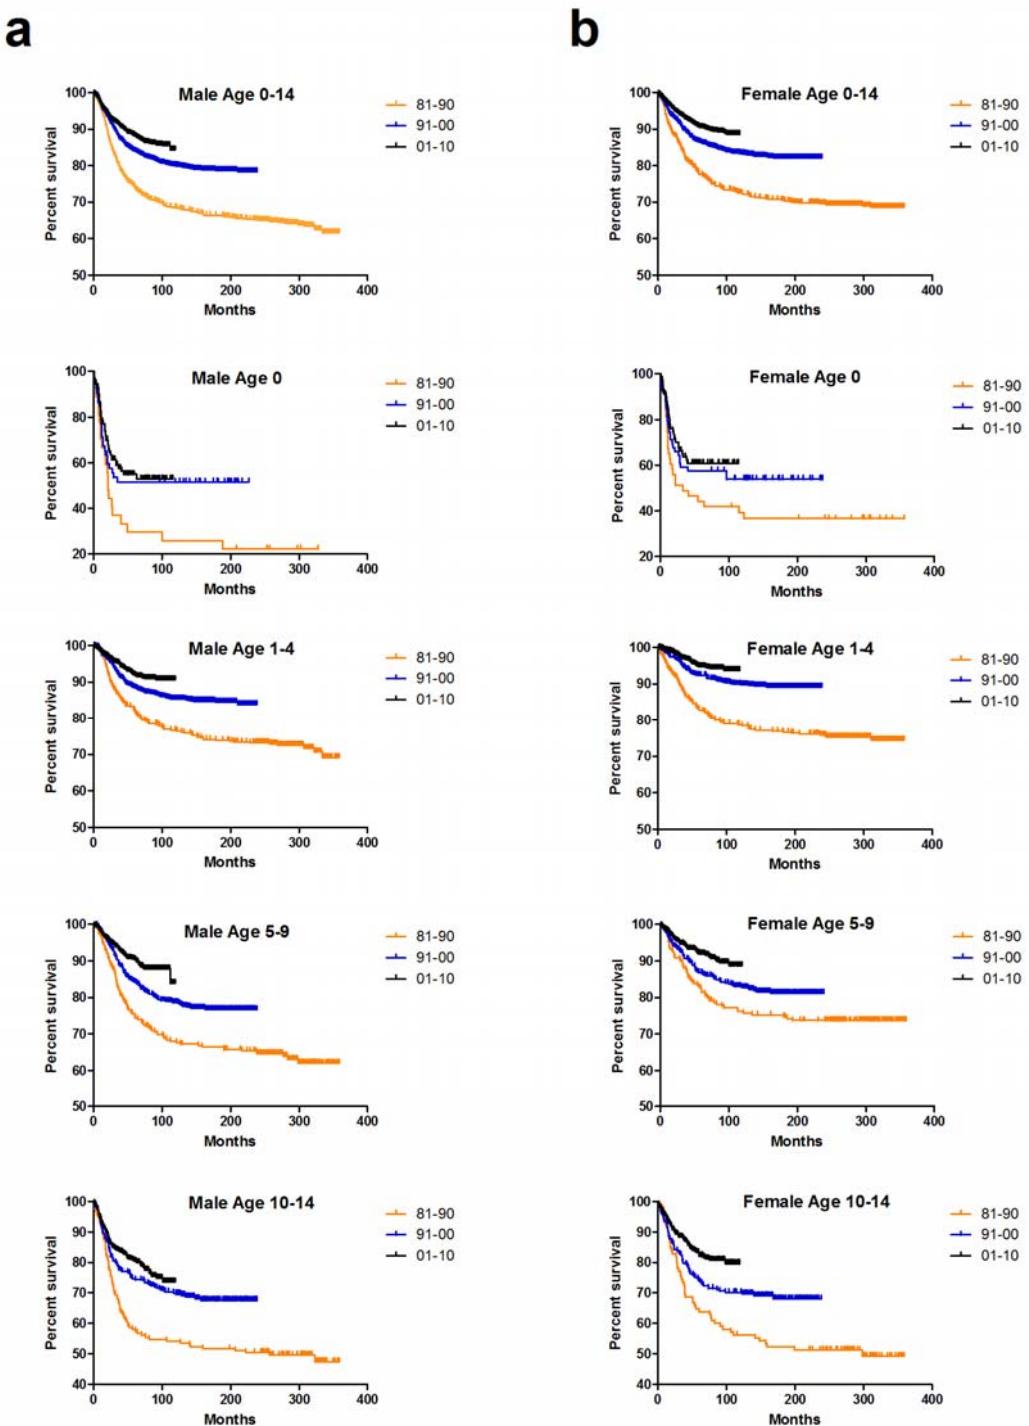

Supplementary Figure S1. Summary data for patients diagnosed with ALL from 1981 to 2010. Data are shown by age group (ages 0-14, 0, 1-4, 5-9, and 10-14 years) and calendar period over the 3 decades. a. Number of patients diagnosed in 9 SEER sites. b. Incidence of ALL in 9 SEER sites.

Supplementary Figure S2.

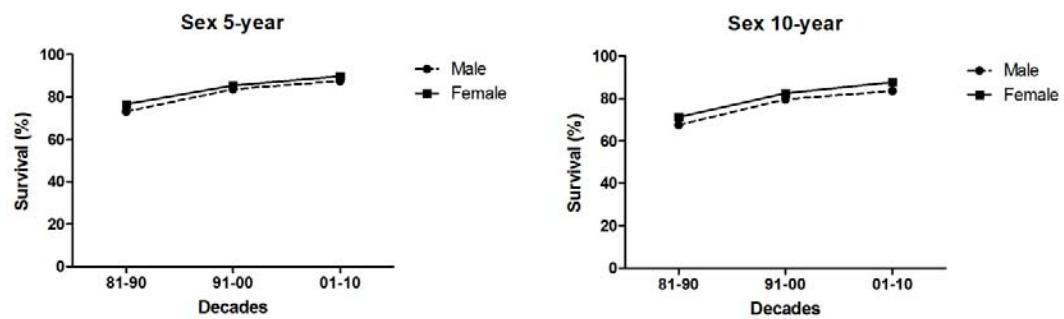

Supplementary Figure S2. Kaplan-Meier survival analysis for patients with ALL from 18 SEER sites from 1981 to 2010. Data are shown by age group (in years) and calendar period over the 3 decades.

Supplementary Figure S3.

Supplementary Figure S3. Kaplan-Meier survival analysis for male (a) and female (b) patients with ALL from 18 SEER sites from 1981 to 2010. Data are shown by age group (in years) and calendar period over the 3 decades.

Supplementary Figure S4.

Supplementary Figure S4. 5-year and 10-year relative survival estimates of patients with ALL age 0-14 years according to sex over 3 decades, from 1981 to 2010, at 18 SEER sites.

Supplementary Table S1. Relative survival estimates: Percentages for male ALL patients during the periods 1981 to 1990, 1991 to 2000, and 2001 to 2010. Data are means \pm SEM, with number of patients in parentheses.
