## SUPPORTING INFORMATION

### Identification of the first small molecule ligand of the neuronal receptor sortilin; and structure determination of the receptor-ligand complex

**Figure S1:** Overview of crystal packing. Differences in crystal packing between the sortilin-AF40431 complex (left figures with the  $\beta$ -propeller in grey and 10CC-domain in green) and the sortilin-neurotensin complex (right figures with the  $\beta$ -propeller in orange and 10CC-domain in green). **A)** Overview of the crystal packing with the symmetry related molecules (within a distance of 5 Å) in lighter colours. **B)** Side view displaying the off-centre packing in the sortilin-AF40431 complex crystal form. **C)** Top view displaying the off-centre packing in the sortilin-AF40431 complex crystal form.
