

Supplemental Figure 1. Breadth of ex vivo IFN- γ ELISPOT responses to NPM1 peptide pools following dose-escalation vaccination with ChAdOx1-NPM1. (A) Stacked bar graph showing IFN- γ ELISpot responses from vaccinated volunteers at baseline (day 0) and days 14 and 21. Volunteers #403, 405 and 408 received 5×10^8 vp, volunteers #406, 401 and 404 received 5×10^9 vp, volunteers #413, 411 and 407 received 2.5×10^{10} vp and volunteers #415, 416, 412, 421, 417, 422 received 5×10^{10} vp. Negative control was cells stimulated with R10 alone.
