

Supplemental Data

A Novel Aliphatic ^{18}F -Labeled Probe for PET Imaging of Melanoma

Hongguang Liu, Shuanglong Liu, Zheng Miao, Han Jiang, Zixin Deng, Xuechuan Hong, Zhen Cheng

Supplemental Figure 1. Decay-corrected whole-body coronal microPET images of mice bearing PC3 tumor from a static scan at 0.5, 1, and 2 h after injection of ^{18}F -FPDA. Tumors are indicated by red arrows .

Supplemental Figure 2. Decay-corrected microPET quantification of athymic male nude mice bearing PC3 tumor from a static scan at 0.5, 1, and 2 h after injection of ^{18}F -FPDA.
