

Online Resorce 2. Haplotype frequency of examined RAPTOR variants

<b>rs11658698</b>	<b>rs12602885</b>	<b>rs869190</b>	<b>p-value</b>	<b>OR</b>	<b>CI 95%</b>
C	G	G	-	-	-
T	G	G	0.982	0.981	0.798 - 1.21
C	A	T	0.823	0.965	0.761 - 1.23
C	G	T	0.888	0.875	0.496 - 1.54
C	A	G	0.978	0.978	0.464 - 2.06

Haplotypes not frequent enough to allow haplotype analysis were excluded from the table.  
The reference haplotype corresponds to the most frequent one (CGG).

Common variants of ZNF750, RAPTOR and TRAF3IP2 genes and psoriasis risk.

Archives of Dermatological Research.
